

UCIMU-SISTEMI PER PRODURRE

ITALIAN TECHNOLOGY CENTER (ITC) is a business network agreement among a group of Italian capital goods manufacturing companies. This innovative project is promoted by UCIMU-SISTEMI PER PRODURRE (the Italian machine tools, robots and automation manufacturers' Association), AMAPLAST (the Italian plastics and rubber machinery and moulds manufacturers' Association) and ACIMGA (the Italian manufacturers association of machinery for the graphic, converting and paper industry), and allows the flexible collaboration among leader Italian machinery manufacturers to share resources and knowledge with the common aim of strengthening their relations in the Indian market.

The main objectives of ITC are: promoting the ITC trademark, as well as the brands of ITC companies; supporting the internationalization of Italian member companies within the area, by establishing a constant market presence; carrying out initiatives aimed at increasing the visibility of ITC companies, like seminars and workshops, B2B meetings and other strategic activities in India.

In order to have a more effective and structured monitoring of the Indian market, in 2013 ITC office was opened in Pune (India) where a team of selected engineers, with strong competences in the machine tools, plastic and paper machinery sectors, is available to support Italian ITC member companies in their entering strategy in India but also to facilitate the contact with Italian companies to Indian machinery end users, institutions, agents and so on.

In fact, Indian companies have an opportunity to consider ITC as their first point of reference in India and can get an immediate answer/feedback to their queries from the Italian companies. Fresh enquiries and technical solutions can also be discussed and forwarded to the listed companies.

ITALIAN TECHNOLOGY CENTER - ITC  
Office No. 003, Lunkad Sky Station  
Near HDFC Bank, Datta Mandir Chowk  
Viman Nagar, Pune-411014, India

Sr. No.	Company Name	Details of Machineries	Companies Logo	Website
1	BLM S.p.A	Tube processing machines (Laser Tube cutting, CNC Tube bending, end-forming, automatic sawing, tube/bar cutting and end-machining), Wire bending machines, Five Axis Laser cutting machines, Laser sheet cutting machines, Combination laser cutting system for sheet and tube.	 BLM GROUP	<a href="http://www.blmgroup.com">www.blmgroup.com</a>
2	BUFFOLI TRANSFER S.p.A	CNC Rotary Transfer Machines (Bar or Blanks), complete with automation, robotic and gaging systems. IoT (I4.0) technology and software.	 BUFFOLI INDUSTRIES	<a href="http://www.buffoli.com">www.buffoli.com</a>
3	FICEP S.p.A	CNC lines for the processing of profiles and plates for the steel construction industry (drilling, milling, marking, scribing, sawing, plasma and oxy cutting, punching, shearing). Hydraulic, mechanical and screw presses, shears, saws and automation for the forging industry.	 FICEP	<a href="http://www.ficepgroup.com">www.ficepgroup.com</a>
4	LORENZON S.r.l	Knives and jaws for tube industry, guideway and sideways for machines and hydraulic presses, knives and blades with all the shapes for metal industry, precision plates and liners for rolling mills, machining up to 10 meters.	 LORENZON 1933	<a href="http://www.lorenzon-it.com">www.lorenzon-it.com</a>
5	LOSMA S.p.A	Air filtration systems and coolant filtration systems for machine tools	 LOSMA® WORKING CLEAN, BREATHING HEALTHY	<a href="http://www.losma.in">www.losma.in</a>
6	MILLUTENSIL S.r.l	Die & Mould spotting presses, dies splitters for splitting, equipment for presses, coil lines, cut to length line ( CTL ).	 MILLUTENSIL®	<a href="http://www.millutensil.com">www.millutensil.com</a>
