Inventory & Warehouse

CRM & Marketing Automation

Human Resource Management

deskera.com

Deskera MRP

Plan and manage materials, resources, machines and production schedules efficiently.

Work Order Management

Automate work order task creation and assignment, track progress, and monitor completion with real-time updates. Monitor resources, costs and time associated with each work order for improved accuracy and efficiency.

Material Requirement Planning

Plan and manage materials and inventory for production. Keep track of materials and components needed for production, track stock levels, plan orders, and optimize purchasing and production processes.

Process Scheduling

Outline all the anticipated production activities for the company. Design the entire schedule based on accurate information such as forecasts, external orders, products to be produced, the production quantities, the due dates, and the priorities.

BOM Explosions

Create bills of materials for every product with BOM explosions. Quickly view components and sub assemblies in an easy to read tree structure.

Contract Manufacturing

Automate the planning, scheduling, and tracking of outsourced production with integrated tools. Easily monitor the costs and progress of contract manufacturing jobs. Gain comprehensive visibility of the entire process from supplier selection to order fulfillment.

Delivery Scheduling

Define discreet delivery milestones and set up alerts and automations to ensure timely completion of associated jobs. With on-time delivery always remain in the good books of your customers.

Scrap Management

Manage by-products and scraps effectively with this feature to monitor and track their creation, storage, and usage. Keep track of the production of by-products and scraps with their associated costs and profits, and ensure that they are correctly accounted for in inventory. Monitor and track their use in production processes, or their sale as a finished product.

Operator Availability

Easily track operator skills & availability. Map operator skills against machines, record operator times, specify operator costs, and track operator availability. Roll up labor costs to costs of finished goods.

Demand Forecasting

Anticipate future customer demand and optimize inventory levels. Accurately predict customer needs and maximize supply chain efficiency. Generate more accurate sales forecasts and manage inventory levels more effectively.

Production Planning

Create production plans with ease. Assign resources, set schedules and deadlines, and manage your entire process in one place. Track production costs and optimize efficiency with comprehensive analytics.

Multi Level Bill of Materials (BOM)

Manage product structures with ease using Multi Level Bill of Materials. Assign multiple components to a single product. Identify components and subcomponents of each product and easily track their usage, movement, and costs.

Machine Management

Easily monitor and optimize performance, improve maintenance scheduling, and automate data collection across machines. Gain visibility into operations, reduce unnecessary downtime, and increase productivity.

WIP Tracking

Track work-in-progress (WIP) with ease, Monitor production progress and identify bottlenecks quickly with effective resources and materials tracking functionalities. Generate real-time reports to analyze estimated WIP levels. Optimize production and ensure efficient utilization of resources.

Yield & Cost Calculations

Accurate production outputs. Calculate yields and costs of finished goods with ease. Automatically capture production costs and analyze product profitability. Generate reports that can be used to assess price competitiveness.

Quality & Compliance

Maintain quality compliance parameters for high product quality. Define quality parameters at different product and sub-product levels. Create and save different quality groups for product classification, maintain a quality checklist, monitor product quality in real-time.
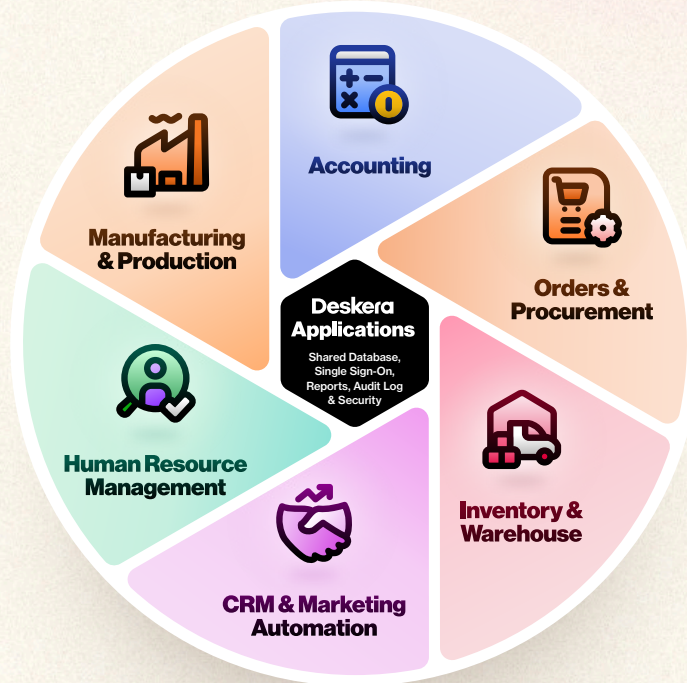

Manufacturing Reports

Generate comprehensive production reports to monitor the cost, efficiency and profitability of production operations. Track production processes, gain insight into process bottlenecks, and identify cost-saving opportunities.

Deskera MRP

Cloud MRP for in-house and contract manufacturing. Get all ERP & MRP features in one integrated solution.

Deskera Applications
Shared Database, Single Sign-On, Reports, Audit Log & Security

- Manufacturing & Production
- Accounting
- Orders & Procurement
- Inventory & Warehouse
- CRM & Marketing Automation
- Human Resource Management

Accounting & Finance
Better Financial Control

Track transactions, create GST-enabled invoices, e-invoices from credit & debit notes, file GST returns easily, generate reports, monitor accounts receivable and payable, create custom financial year schedules, maintain tax compliance, and manage multiple currencies.
